

Improved & Upgraded

Alex Ultrasonic Generator

We suggest the best solution for your cleaning process

- ★ Economy Multi Drives Function
- ★ Adjustable Output Power Function
- ★ Sweep Function
- ★ 6 Types of Frequency
28KHz, 40KHz (Neo Sonic), 72KHz, 104KHz, 130KHz, 170KHz (Soft Sonic)
- ★ Output Power Level
300 ~ 2400 (Neo Sonic), 300 ~ 1200W (Soft Sonic)

Economy Multi Drives

You can control more than one transducer at the same time using one generator. It is very economy. For options, it is available to drive several transducers individually.

Only one generator can control several transducers which are set in the different tanks.

Available Long Term Using

It can provide more stable ultrasonic power for the long term due to improvement of electric circuits. High stability in the tough cleaning environment.

Adjustable Output Power function

You can change output power level with frequency depending on types of cleaning from soft to powerful.

Sweep Function

It can resolve the uneven cleaning by preventing standing waves to sweep the frequency up and down.
